WHY CHOOSE GO-ECO?

- ✓ Environmentally friendly heating for homes and businesses
- ✓ 19MJ/kg minimum energy content
- ✓ Contains less than 9% moisture
- ✓ 100% British rapeseed
- ✓ Go-Eco fuel produces less than 7% ash

FARM GROWN FUEL

THE COMPLETE GO-ECO RANGE

BRIQUETTES

- Our main alternative to wood logs come in boxes of 12 small briquettes (1.25kg) and 6 large briquettes (2.5kg).
- They can be purchased in quantities between large pallet sized amounts and individual boxes depending on your requirements.
- For pallet sized quantities ask your stockist for details.

ENVIRO FRIENDLY

A naturally grown green fuel for all solid fuel burning appliances, a great alternative to wood and coal.

NUGGETS

- Coal size nuggets provide a cleaner, greener, wonderfully warming alternative to fossil fuel.
- Available in sizes between large pallet sized tote bags and individual 10kg bags, we can cater for whatever your preference is.
- For pallet sized quantities ask your stockist for details.

FARM GROWN

Go-Eco is unique, sustainable and completely traceable back to the field where it was grown.

PELLETS

- Perfect for boilers and all hopper fed appliances, pellets are the small, easy lighting way to warm your home all year round.
- They are available in sizes between large pallet sized tote bags or smaller 10kg bags, whatever suits you best.
- For pallet sized quantities ask your stockist for details.

HOT STUFF

Go-Eco solid fuel burns up to three times as long as wood and gives off almost twice the heat.
